DETAILED ACTION

The abstract of the disclosure is objected to because it contains the term "novel". Correction is required. See MPEP § 608.01(b). Deletion of this term will overcome the rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-7, 19-25 and 29-30 are rejected under 35 U.S.C. 112, first paragraph, because the specification, is not enabling for using the compounds of formula 1 and does not reasonably provide enablement for using the remaining claimed compounds of formula 1

Applicants' comments have been noted and considered but are not deemed persuasive of patentability for the reasons set forth in the previous office action.

Here is no enabling disclosure that any dose of these compounds do anything.. The specification discloses prior Raf active compounds. However, there is no disclosure providing this activity when M is pyridinyl in applicants' formula I.

It is noted that these claims, the numerous variables (e.g. A, B, L, Q, R1, R2, R3, R4, R5, R6, R7, heterocyclic substituents etc.) and their voluminous complex meanings and their seemingly endless permutations and combinations and the lengthy list of named compounds in claim 6, make it virtually impossible to determine the full scope and complete meaning of the claimed subject matter.

Compounds of such structural difference would not be expected to have similar utilities absent evidence to the contrary.

No claim is allowed.
